

AUTHOR AGREEMENT AND LICENSE TO PUBLISH ENDOBRIDGE ABSTRACTS IN THE JCEM CASE REPORTS

AUTHORSHIP OF THE WORK

- ❖ The Author(s) warrants that the Work in its entirety is original except for those parts that are reproduced or adapted with permission from other sources and acknowledged as such within the Work, that all the facts it contains are true and accurate and has not been published other than as an abstract in any language or format and has not been accepted elsewhere for print or electronic publication consideration. The Author(s) further warrants that the Work does not contain any material that is defamatory or the publication of which would violate any copyright or other personal, intellectual, property, contract, or proprietary right of any person or entity.
- ❖ The Author(s) warrants that each person listed as an author meets the Authorship Conditions and understands the Authorship Obligations described in the [Ethical Guidelines for Research](https://www.endocrine.org/-/media/endosociety/files/about-us/corporate-info/code-of-ethics.pdf) on the Endocrine Society's website at <https://www.endocrine.org/-/media/endosociety/files/about-us/corporate-info/code-of-ethics.pdf>. All Author(s) consent to the investigation of any improprieties that may be alleged regarding the Work. Each Author(s) further releases and holds harmless the Endocrine Society from any claim or liability that may arise therefrom.
- ❖ If the Work has been prepared by an Author(s) as an employee within the scope of their employment, the Author(s) represents that the employer has been made aware of, and consents to, the terms of this License. This License includes authorization for the employer to make copies of the Work for its own internal use.
- ❖ If all Author(s) are US Government employees and the Work was written as part of the official duties of the Author(s) as employees of the US Government, then the Work may not be subject to US copyright or the ownership provisions of this License. Nevertheless, to the extent allowed by, and consistent with, applicable law, the Author(s) authorize publication of the Work in the Endocrine Society publication under terms equivalent to those provided for in the license and agree to all of the warranties specified in the license.

OWNERSHIP OF THE WORK

- ❖ The Endocrine Society acknowledges and agrees that the Author(s) of this Work own all right, title, and interest of any nature, throughout the world, to the Work, including any copyright registration or applications for copyright registrations relating thereto anywhere in the world. The Work as defined

includes but is not limited to text, figures, tables, artwork, abstracts, cover images, summaries, and supplemental data. Notwithstanding the foregoing, the Endocrine Society may secure copyright registration for any collection or compilation in which the Work is published by the Endocrine Society.

- ❖ The Author(s) grants to the Endocrine Society, for the full term of copyright and any extensions thereto a sole and exclusive (except as provided in this Agreement) irrevocable license to publish, sell, reproduce, distribute, transmit, display, store, translate, create derivative works from and otherwise use the Work in any language or in any form, manner, format, or medium now known or hereafter developed without limitation throughout the world, and to permit and/or license others to do any or all of the above.

USE OF THE WORK

- ❖ The Author(s) agrees that when reproducing the Work or extracts from it, the Author(s) will credit first publication of the Work in the Endocrine Society publication by name, *JCEM Case Reports*.

The Author(s) retains the following nonexclusive rights:

- The Author(s) reserves the right after publication of the Work to use all or part of the Work in compilations or other publications of the Author's own works, and to make copies of all or part of the Work for the Author's use for lectures, classroom instruction, or similar uses.
- The Author(s) reserves the right to post the Work (including the Endocrine Society's formatted PDF) after final publication on the Author(s)'s web page provided that a link to the article in the Endocrine Society's publication is included, *JCEM Case Reports*.
- The Author(s) reserves the right to post and update the Work on pre-print services provided that the Endocrine Society-formatted files (HTML and PDF) are not used and that a link to the Work in the Endocrine Society's publication is included, *JCEM Case Reports*.
- The Author(s) reserves the right to deposit his or her final accepted manuscript in the Author(s)'s funding body's archive or designated repository; provided that a link to the Work in the Endocrine Society's publication is included, *JCEM Case Reports*.

PROTECTION OF THE WORK

- ❖ The Author(s) authorizes the Endocrine Society to take such steps as it considers necessary at its own expense in the Author(s)'s name and on their behalf if it believes that a third party is infringing or is likely to infringe the copyright in the Work.
- ❖ These Terms are governed by the internal laws of the District of Columbia, USA. The Author(s) agrees that any action arising out of or in any way relating to these Terms may be brought only in a court of competent jurisdiction in the District of Columbia and the Author(s) hereby consents to the jurisdiction, venue, and convenience of such courts. Any waiver of any provision of these Terms will be effective only if it is in writing and signed by the Endocrine Society. No waiver of any provision of these Terms shall be deemed a further or continuing waiver of such provision or any other provision. If any provision of these Terms is found to be invalid, void, or unenforceable by any court having competent jurisdiction, the remainder of these Terms shall remain in full force and effect.

PATIENT CONSENT

- ❖ All patients have a right to privacy and personally identifying information must not be revealed without consent. Case reports should follow International Committee of Medical Journal Editors (ICMJE) recommendations. Authors must attest that they have secured all required patient consent forms, to be made available to the Endocrine Society on request. Identifying information, including names, initials, exact dates, or hospital numbers must not be published in written descriptions, figures, or photographs unless the information is essential for scientific purposes and the patient (or parent or guardian) gives written informed consent for publication. Informed consent for this purpose requires that an identifiable patient be shown the materials to be published.
Nonessential identifying details should be omitted. Informed consent must be obtained if there is any doubt that anonymity can be maintained. For example, simply masking the eye region in photographs of patients is inadequate protection of anonymity. The Endocrine Society has the final decision on what information is potentially identifying and when patient consent is required.
