

Martin Heinrich Reincke, Professor of Endocrinology, Chair of Medical Department IV, Ludwig-Maximilians University in Munich

The Medical Department IV is part of Ludwig-Maximilians University, one of the leading institutions in German academic medicine. His research specialities include endocrine hypertension including primary aldosteronism, Cushing's syndrome, pituitary and adrenal diseases. Professor Reincke is heading a research team specifically exploring the prevalence and relevance of mineralocorticoid excess in resistant hypertension on the epidemiological, clinical, genetic and molecular level. Professor Reincke is a member of many national and international societies, including the Endocrine Society, European Society of Endocrinology and European Network of the study of adrenal tumors. He has served in the Executive Board of the German Endocrine Society and European Society of Endocrinology, is on the editorial board of several international journals, has served as teaching Dean of the Faculty from 2006-2012, and as president of the German Endocrine Society (2014-2017). Prof. Reincke won the prestigious European Research Council Advanced Grant Award (2.5 Mio €) in 2016. He is currently president of the European Society of Endocrinology. His publication include more than 560 Medline listed manuscripts, cited >16.400 times, his h-index is 68.
